

# Let's Make a Spin Drum

Supplies: cardboard, pencil, string, two beads, scissors, glue

Start by drawing and cutting two circles the same size out of cardboard or heavy paper.

Next, decorate one side of each circle.

Put glue on the undecorated side of each circle making sure they are completely covered. Then sandwich a pencil between the two circles. Press the circles together. They may need to dry a few minutes before the next step.

Poke a hole on each side of the circle and tie a string, with a bead attached, to the circle.

Place the palms of your hands together around the pencil. Rub your hands back and forth to make the drum play.
